4.3.1 - Institution frequently updates its IT facilities including Wi-Fi

With the increasing demand for internet access in educational campuses due to evolving standard of education and flexibility offered by the Internet - universities, colleges, educational institutes etc., are keenly stepping forward to setup secured and stable wired or Wi-Fi network campus for their students. As per the current market trend, most of the students like to carry 3-4 devices with them like mobile, tablets, laptops etc. with them to campus. As these devices devour bandwidth, colleges and universities are struggling hard to keep up with the bandwidth demand.

There is no Band Width Internet Connection in the College. Being a government institution situated in a rural area it is difficult to provide high bandwidth internet facilities due to lack of appropriate financial and technological aspects. Even though we try to provide modern equipments like computers, smart class rooms, Photostats machine with scanner and digital podium to bring them technological facilities.
